DURHAM, NH – Bernie Sanders, Joe Biden, and Elizabeth Warren are current favorites in the 2020 New Hampshire Democratic presidential primary, though most are still trying to decide whom to support. Interest in the primary is at an all-time high. Just over half of likely Republican primary voters plan to vote for Donald Trump, slightly lower support than Barack Obama received among Democrats at the same point in his first term.

These findings are based on the latest **Granite State Poll***, conducted by the University of New Hampshire Survey Center. Five hundred and one (501) randomly selected New Hampshire adults were interviewed in English by landline and cellular telephone between August 2 and August 19, 2018. The margin of sampling error for the survey is +/- 4.4 percent. Included in the sample were 199 likely 2020 Republican Primary voters (margin of sampling error +/- 6.9 percent) and 198 likely 2020 Democratic Primary voters (margin of sampling error +/- 7.0 percent).

Interest in 2020 New Hampshire Presidential Primary

Although we are still a year and half away from the 2020 New Hampshire presidential primary, six in ten Granite Staters (60%) already say they are extremely interested in the primary, another 20% are very interested, 15% are somewhat interested, and 4% are not very interested. Interest in the 2020 primary has increased since this April (52% extremely interested) and is at an all-time high since the question was first asked in 2007.

Democrats (64%) are slightly more likely than Republicans (58%) and Independents (56%) to say they are extremely interested. The percentage of Independents who are extremely interested has increased markedly since April (33% in April, 56% in August).

Extremely Interested in Primary

* We ask that this copyrighted information be referred to as *the Granite State Poll*, conducted by the University of New Hampshire Survey Center.

New Hampshire residents are more likely to say they will definitely vote in the upcoming presidential primary than in April or at similar points in the last two primary cycles. Eighty-two percent of New Hampshire adults say they will definitely vote in the 2020 New Hampshire presidential primary, compared to 73% in April, 71% in July 2014, and 77% in July 2010. Overall, 82% say they will definitely vote, 10% will vote unless there is an emergency, 3% say they may vote, 2% probably will not vote, and 3% are unsure.

Republicans (89%) are slightly more likely than Democrats (83%) or Independents (74%) to say they will definitely vote in the primary, though Independents are much more likely to say they will definitely cast a ballot than in April (56%).

Will Definitely Vote in Primary - By Party ID

2020 Democratic Primary

Despite heightened interest, very few likely voters have decided who they will vote for. More than three-quarters of likely Democratic primary voters (78%) say they are still trying to decide whom they will support in 2020, while 13% say they are leaning towards someone and 8% have definitely decided.

Definitely Decided on Candidate - Democratic Primary Voters

Nearly two-thirds of Democratic primary voters (65%) remain undecided or cannot provide a name when asked an open-ended question about whom they will vote for in 2020. Democratic primary voters most frequently mention 2016 winner Vermont Senator Bernie Sanders (12%), Former Vice President Joe Biden (6%), Massachusetts Senator Elizabeth Warren (6%), Massachusetts Representative Joseph Kennedy III (3%), and California Senator Kamala Harris (2%). Results were similar to those since October 2017.

Preferred Democratic 2020 Presidential Nomination Candidate - Open-ended

When provided a list of Democrats who are considered likely candidates for the 2020 nomination, 30% of likely Democratic primary voters support Sanders, 19% pick Biden, and 17% favor Warren. Fewer likely voters choose Kennedy (7%), New Jersey Senator Cory Booker (6%), Harris (3%), Former Attorney General Eric Holder (2%), Former Maryland Governor Martin O'Malley (1%), Maryland Representative John Delaney (<1%), New York Senator Kirsten Gillibrand (<1%), or Colorado Governor John Hickenlooper (<1%). Two percent of respondents mentioned another candidate while 12% remain undecided.

There has been little change in levels of support for Democratic candidates.

Likely Democratic primary voters aged 18 to 34, self-identified Independents, and North Country residents are more likely than others to support Sanders, those aged 35 to 49 are more likely to support Biden, and those aged 50 to 64 are more likely to support Warren.

Preferred Democratic 2020 Presidential Nomination Candidate - List

2020 Republican Primary

Despite Donald Trump being the incumbent President, only one quarter (23%) of Republican primary voters say they have definitely decided whom they will support in the 2020 Republican presidential primary, largely unchanged since April (24%). Ten percent of Republican primary voters say they are leaning toward someone while just over two-thirds (68%) are still trying to decide.

Definitely Decided on Candidate - Republican Primary Voters

While more than 80% of Republicans approve of President Trump's job performance, only 56% of likely Republican primary voters say they plan on voting for Donald Trump in the 2020 New Hampshire Republican presidential primary, largely unchanged since April (55%). Twenty percent say they plan on voting for another candidate, while 24% don't know or are unsure.

Likely Republican primary voters who never attend religious services, those who listen to conservative talk radio, those who voted for Donald Trump in 2016, self-described conservatives, and Manchester Area residents are more likely than others to say they plan to vote for Trump in the 2020 Republican primary. Likely Republican primary voters who are self-identified Independents and self-described moderates are less likely to say they plan to vote for Trump.

Plan on Voting for Trump or Other Republican Candidate?

The percentage of likely Republican primary voters who say they will vote for Trump remains slightly lower than the percentage of likely Democratic primary voters who said they would support Obama at the same point in the 2012 cycle; 63% of Democrats in July 2010 said they planned to vote for Obama in the 2012 Democratic presidential primary, while 56% of Republicans currently say they plan to vote for Trump in the 2020 Republican presidential primary.

Plan on Voting for Incumbent President in Primary

Granite State Poll Methodology

These findings are based on the latest Granite State Poll, conducted by the University of New Hampshire Survey Center. Five hundred and one (501) randomly selected New Hampshire adults were interviewed in English by landline and cellular telephone between August 2 and August 19, 2018. The margin of sampling error for the survey is +/- 4.4 percent. Included in the sample were one hundred and ninety-nine (199) likely 2020 Republican Primary voters (margin of sampling error +/- 6.9 percent) and one hundred and ninety-eight (198) likely 2020 Democratic Primary voters (margin of sampling error +/- 7.0 percent). The design effect for the survey is 1.3%.

The random sample used in the Granite State Poll was purchased from Marketing Systems Group (MSG), Horsham, PA. MSG screens each selected telephone number to eliminate non-working numbers, disconnected numbers, and business numbers to improve the efficiency of the sample, reducing the amount of time interviewers spend calling non-usable numbers. When a landline number is reached, the interviewer randomly selects a member of the household by asking to speak with the adult currently living in the household who has had the most recent birthday. This selection process ensures that every adult (18 years of age or older) in the household has an equal chance of being included in the survey.

The data have been weighted to adjust for numbers of adults and telephone lines within households. Additionally, data were weighted by respondent sex, age, education, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau. In addition to potential sampling error, all surveys have other potential sources of non-sampling error including question order effects, question wording effects, and non-response. Due to rounding, percentages may not sum to 100%. The number of respondents in each demographic below may not equal the number reported in cross-tabulation tables as some respondents choose not to answer some questions.

For more information about the methodology used in the Granite State Poll, contact Dr. Andrew Smith at (603) 862-2226 or by email at andrew.smith@unh.edu.
